ANTERIOR & COMPLEX CASE SPECIALISTS™

bonadent DENTAL LABORATORIES

Webinar Series:

Realizing Predictable Results with your Anterior Cases

Filling IN THE Gaps™ Enhancing your clinical expertise.

Course Description:

This webinar focuses on achieving consistent, predictable outcomes in anterior dental restorations through systematic planning, evidence-based techniques, and precise execution. Participants will explore the fundamental principles of anterior esthetics, including smile design, photography and pre-operative material requirements, material selection, and clinical strategies. The course emphasizes a methodical approach to case assessment, treatment planning, and execution that minimizes complications and maximizes patient satisfaction.

Clinicians will gain insight into complex anterior cases—from single-tooth restorations to full smile makeovers with a focus on communication strategies, workflows, and troubleshooting common challenges that arise in anterior restorative dentistry.

This lecture is designed for general dentists seeking to enhance clinical outcomes, reduce chair time, and build confidence in delivering high-quality anterior restorations.

Learning Objectives:

Upon completion of this seminar, participants will be able to:

- Review comprehensive smile design analyses that include facial esthetics, dental proportions, and patient preferences for anterior case treatment planning.
- Understand proper reduction depths for given materials, and strategies for optimal fit and esthetics.
- Select appropriate restorative materials based on clinical indications, understanding the advantages and limitations for anterior applications.
- Implement effective shade matching and communication strategies using visual and digital tools to accurately capture and convey tooth color, translucency, and characterization to the dental laboratory.
- Understand digital technologies including intraoral scanning, digital smile design software, and CAD/CAM workflows to improve precision, predictability, and patient communication in anterior cases.
- Diagnose and address common complications with anterior restorations, including unsuitable material selection, failed photography and shade mismatches.
- Discuss effective patient communication skills for case presentation and managing both patient expectations and satisfaction throughout the treatment process.

Featured Speaker

Dave Terrazas

Dave has spent 30+ years in the dental lab industry. He has extensive knowledge of Crown & Bridge, Digital Implant Workflows, and Removable Restorations. Dave has attended LVI courses with William Dickerson in Anterior Esthetics, Full-Arch and Full-Mouth Rehabilitation. Dave is committed to utilizing a collaborative approach for successful treatment planning.
