WEBINAR SERIES

Complete Removables: A System for Acheiving Consistent Outcomes

Filling IN THE Gaps™ Enhancing your clinical expertise.

Course Objectives:

Complete removable restorations remain one of the most clinically demanding yet rewarding disciplines in general dentistry. This course provides a practical framework grounded in proven principles and modern techniques and is designed to demystify the removable process by presenting systems that deliver predictable, esthetic, and functional results — case after case.

Learning Objectives:

Upon completion of this seminar, participants will be able to:

- Apply a systematic workflow for complete denture fabrication that promotes consistent, high-quality outcomes
- Perform primary and definitive impressions using techniques appropriate for varying ridge morphologies and tissue conditions
- Accurately record maxillomandibular relationships, including vertical dimension of occlusion and centric relation, using reliable and reproducible methods
- Select ideal teeth to achieve optimal esthetics, phonetics, and occlusal function
- Communicate effectively with laboratory technicians to ensure clinical goals are accurately translated into the final prosthesis
- Apply evidence-based principles to treatment planning for edentulous and transitioning-to-edentulous patients

Featured Speaker

Dave Terrazas

Dave has spent 30+ years in the dental lab industry. He has extensive knowledge of Crown & Bridge, Digital Implant Workflows, and Removable Restorations. Dave has attended LVI courses with William Dickerson in Anterior Esthetics, Full-Arch and Full-Mouth Rehabilitation. Dave is committed to utilizing a collaborative approach for successful treatment planning.
